1. The following is an examiner's statement of reasons for allowance:

Claims 1-6, 8-12, 14-17, 19 and 20 are allowed.

Regarding claim 1, the prior art of record does not teach all the combined steps for a method for presetting motor phase in a web printing press, including subsequent to the determining step, providing a mark on a first printing form using plate or image making equipment, the plate or image making equipment providing the mark as a function of the determined desired preset phase for a motor driving the first printing form during printing; and presetting the phase of the motor as a function of the sensor output.

Regarding claim 14, the prior art of record does not teach all the combined elements and or components for a web printing press including a first printing group for printing a first web and having at least one first drive motor and the first printing form, the first printing form having the first mark providing first preset motor phase information for presetting the first drive motor to a first preset phase; and a controller for determining the first preset motor phase information as a function of the output of the first sensor and determining the desired preset motor phase information and providing the desired preset motor phase information to the plate or image making equipment.
